

## Career Development: Statistics: 2009

Of the 48 May 2009 graduates, 77 percent (37 people) reported employment in their field or pursuit of further study by October 5, 2009. Of those 37 alumni, 22 are in Madison, five are in Washington, D.C., and seven are working elsewhere in the United States. One is on a Fulbright to Nepal; another is teaching English in China; a third is in Geneva with the Global Fund to Fight AIDS, Tuberculosis and Malaria. Thirty-one students (65 percent) reported having jobs in their field.

*As of August 10, 2009:* Sixty-nine percent (33 people) reported employment or further study. Twenty-one percent (seven people) planned to pursue further study. Twenty-six students (54 percent) reported having jobs in their field. In comparison to August 2008, a class of 56 students, 66 percent (37 graduates) reported they were working or learning in their fields. However, three people (5 percent) were pursuing additional education, compared to seven students (15 percent) in 2009. Thirty-four students (61 percent) reported having jobs in their field by August 2008.
