Convener, Panel on Labour and Politics, Political Studies Association, Warwick, 1978.  
Chair and organizer, workshop on interest groups, European Consortium for Political Research, Berlin, 1977.  
Discussant, panel on history and political science, American Political Science Association, San Francisco 1996.

#### CURRENT RESEARCH

“Wisconsin Style: New Approaches to Regulatory Innovation.” (Ira and Ineva Reilly Baldwin Wisconsin Idea Endowment Grant) Wisconsin's legislative and executive leaders believe new regulatory approaches are needed to ensure environmental excellence and economic growth. The current regulatory process is seen as inefficient and adversely affecting the state's business climate and job creation. However, Wisconsin is poised to be a global leader once again in environmental protection, especially in light of current regulatory reform efforts that may enable the state to achieve higher levels of environmental protection without incurring major economic costs. This project involves collaboration with legislators, state agencies, environmental groups, business organizations and others to reinvent and create new approaches to regulatory reform that draw upon best practices from nations around the world. The goal is to produce higher levels of environmental performance by businesses through collaboration and cooperation, rather than through the top-down adoption of rigid laws, regulations and taxes. So far, an advisory council has been established with business, government and environmental organizations, and there have been many exchanges between U.S. and European academics, businesses, and governmental and nongovernmental organizations. For example, UW-Madison professors are working with Wisconsin state politicians and have helped with the second phase of the "Bavarian Pact," a partnership between Wisconsin and Bavaria on developing innovations for better environmental protection. A January 2005 conference, <http://www.lafollette.wisc.edu/research/environmentalpolicy/index.html> drew more than 300 people to Madison from around the state, country and the world to explore and advance environmental policy alternatives and regulatory innovations. So far, the Baldwin grant has attracted an additional \$50,000 from other groups, such as the American Chemistry Council, the Wisconsin Department of Natural Resources and the Joyce Foundation. Additional university support has come from the Chancellor's Fund, the Center for the World and Global Economy, and the La Follette School of Public Affairs. A new 2004 Law School course, "New Approaches to Regulation: Law and Policy," complements the project.

“The Domestic Consequences of American Hegemony.” Examines the consequences for American domestic politics of the international and leadership role of the United States, in particular, how international goals and commitments are reconciled with pressures from domestic interests.

“To Market, to Market and Back Again.” Considers the tensions between goals such as trade liberalization and budget cutting on the one hand, and demands for assistance for farmers on the other.

#### COURSES TAUGHT

Undergraduate: American Politics, Interest Groups, U.S. Congress, American Presidency, Business and Politics, Government and Economics; The Growth of the American State, British Politics; “As Others See Us:

Foreigner Perceptions of the United States and Its Political System.”

Graduate: American Politics, Interest Groups, American Presidency, Scope of Political Science, Comparative Politics (Advanced Industrials,) American Public Policy; International Governance.
