Wisconsin Volunteer Joins The Climate Project

Raj Shukla recently completed a rigorous training program led by former Vice President Al Gore to spread the message about the threat of and solutions to global warming.

“Raj is an outstanding example of the millions of Americans who have been energized by the call to action on the climate crisis,” said Gore.

“We are so pleased that he has made a serious commitment to this challenge by coming to Nashville to become part of this unprecedented grassroots effort.”

Over 1000 people have now completed an intensive tutorial about issues surrounding global warming, led by Gore and a team of renowned scientists and environmental educators. In addition, participants received training to conduct a version of Gore’s global warming slide show, popularized in his film, *An Inconvenient Truth*.

“Raj will spend the next year making presentations across Wisconsin discussing how individuals, communities and businesses can be a major part of the solution to the growing crisis of global warming,” continued Gore.

“This used to be controversial, but **the science is in and it is overwhelming...**”
